TTX FLOW SHOCK ABSORBER

With our 2018 TTX Flow we've continued to refine the great 2017 product by adding some even more durable internal components to extend the shocks possible life. The TTX Flow gives the bike improved traction, comfort and predictability which enhances bike stability. For 2018 we're adding in another step of improved bottoming control by an updated bump rubber layout as well as a new PDS design on our shocks for link-less bikes for a smoother transition and gentler bottoming feeling.

FEATURES

- > Patent pending pressure technology
- > Improved bottoming resistance through new bump rubber design
- > Compression and rebound adjusters with indicators
- > Easy spring change due to new spring clip design
- > Easy spring preload adjustment
- > Wide range of springs
