**FRONT PART NO:** FOV 1W00 (LH) / FOV 2W00 (RH)

**REAR PART NO:** FOV 6W00

**CHASSIS CODE:** FORD T6

Embark on your next great journey with Öhlins' new product line for the Adventure segment.

Whether you're driving through town or exploring rough terrain, you should feel confident that your suspension will offer the extra support and versatility to take on whatever conditions come your way. Building on Öhlins' 40+ years of experience in developing premium, cutting-edge suspension technology for Racing, Rally, and Offroad, we're proud to introduce our new suspension for the Ford Ranger. Since day one, our focus has been clear—advanced suspension technology for superior handling and comfort, both on- and off-road.

Our suspension will give your Ford Ranger better grip, improve handling through sharp turns, and maintain stability when you're driving on an incline. It features two-way adjustable damping for compression and rebound, so you can adapt the suspension to your driving style and the road conditions ahead. With greater traction and control, plus the capacity to lift your vehicle up to +1 inches, you will be able to use larger tires, increase ground clearance and tackle any obstacle, whether you're driving through mud, sand, rocks, or water.

In addition to its outstanding damping properties on rugged terrain, the Öhlins suspension for Ford Ranger will also improve your ride quality on common roads and highways. You'll never have to compromise between off-road handling and on-road comfort again, which makes these products a winning combination for your vehicle!

#### GENERAL FEATURES

- > 2.25" shock body, fully aluminum design for improved cooling.
- > 2-way adjustable damping (compression and rebound).
- > Öhlins' industry-leading, pressure-balanced damping prevents cavitation.
- > Designed for 1" lift.
- > Improved top-out strength for solid axles and off-road use.
- > Spherical ball joints for low-friction suspension movement and improved body control.
- > Rebuildable for custom tuning.
- > Possibility to upgrade to our 2-way adjustable compression valve for adjusting high-speed and low-speed compression.
- > 2-year limited warranty.

#### FRONT FEATURES

- > Conventional shock absorber with swivel, high-pressure braided hose in stainless steel for remote reservoir.
- > Design for 1" lift with help of spring preload adjusters.
- > Öhlins' custom ball joint seals for long-lasting free play resistance, even in the dirtiest conditions.
- > Top mounts included.
- > Springs sold separately.

#### REAR FEATURES

- > Conventional shock absorber with piggyback reservoir.
- > Design for 1" lift. Lift bloc included. 25 mm longer u-bolts for rear axle are not included and has to be sourced locally.
- > Equipped with bellows for shaft protection.
- > Designed for standard leaf springs.

#### SPRINGS
