**PART NO FRONT:** POF 5R00 • **PART NO REAR:** POF 6R10 • **CHASSIS CODE:** 718, 981

The Öhlins Advanced Trackday kit for Porsche, features the Öhlins well known TTX technology.

The unique combination of a 46 mm, two way adjusted, through rod and lightweight McPherson strut for the front and a 36 mm lightweight rear mounted TTX shock will completely transform your car.

These products are widely used in the top motorsport series, winners in GT-racing and top touringcar racing series. Equipped with our TTX-technology the shock absorber keeps the pressure in balance, so all you need to focus on is the track ahead. See you at the track!

With more adjustability options, you are able to fine-tune the suspension setting for each individual track as well as the tires you chose to use. Öhlins professional test drivers have tested all settings to find the optimum performance so you can focus on the driving.
