CROSSKART / CROSSKART XTREME

PRODUCT NEWS

TTX 30

The successful TTX-technology shock absorbers is now also available for the use in the Crosskart and Crosskart Xtreme series.

Thanks to the smaller diameter and design for damping forces to the compact and light weight carts the Öhlins TTX concept fits in perfect. Having good suspension on these fast vehicles the TTX 30 gives both the starting performance with excellent traction as well as good chassi control on the track. The shock absorber kits are available from your Öhlins distributor or from the main crosskart manufacturers.

FEATURES

- > TTX-technology
- > Compression and rebound damping adjusted separately
- > 30 mm piston
- > Springs ordered separately
- > Different spring options available, please see table on next page
- > Full maintenance and service capability
- > Shock absorber covers able to add as an option
- > Spring installation hardware included
