# FKC101/FKC102 CARTRIDGE KIT FOR FLH/FLT TOURING MODELS

The Öhlins FKC101/FKC102 Fork Cartridge Kit introduces Öhlins quality and performance to the front forks of the popular line of Harley Davidson FLH/FLT Touring Baggers.

The goal with the new kit was to create a high-end cartridge damping system with maximum comfort for the Harley-Davidson front forks. The focus for the development of this application has been on vehicle control and a smooth comfortable ride.

The kit features an 8 mm steel shaft, an aluminum damper tube and 25 mm pistons. The kit also features the Öhlins NIX technology with rebound damping in one leg and compression damping in the other leg. This maximizes the damping that is available within the confined diameter of the fork leg.

Due to the mounting requirements of the FLH/FLT fork legs the FKC101/ FKC102 kit has no external adjusters. The kit is easy to install in the originally equipped fork legs. Optional spring rates are available for individual rider weights, preferences and motorcycle use.

It's never been easier to improve the comfort this much.

## FEATURES

- > 25 mm piston
- > Öhlins NIX technology
- > Aluminum damping tubes
- > Optional spring rates
- > Improved feel, control and comfort
- > Easy to install
